DEFERRED PAYMENT AGREEMENT

The Wisconsin Admin Code – PSC 185.38 requires water utilities to offer a deferred payment agreement to residential customers who are unable to pay their bill in full. A DPA consists of two elements: 1) a reasonable down payment; and 2) an installment plan to pay the remaining outstanding balance over a specified period of time. **A customer with a DPA is required to pay his or her current charges in full in addition to the agreed-upon installment payment.** The utility must receive each payment on or before the due date. A late or missed payment will cause the DPA to “default” and place the customer in jeopardy of disconnection. Delinquent amounts paid according to the terms of established DPA are not subject to late charges.

Current amount due is \$_____.

Initial down payment of the bill listed above will be \$_____.

The DPA balance will be paid in _____ payments of \$_____.

The first DPA payment of this agreement will be submitted by_____.

The last DPA payment, which is the remainder of balance, is due by_____.

You have the right to suggest a different payment agreement. If you believe the terms of this agreement are unreasonable, DO NOT SIGN IT!

NOTE: The payments are due and must be made by the 20th of each month.

I _____ (please print name) agree to the terms listed above for service provided by the Village of Stockbridge Utilities to the property address listed above.

Signature: _____ Dated: _____
